SUMMARY

I am a Backend Developer with strong expertise in Django and scalable API development, complemented by a Level 4 certification in Web Application Development and a Certified Ethical Hacker (CEH) credential. My objective is to build high-performance, secure server-side solutions while adhering to industry best practices in both development and application security. Currently, I am enhancing my technical and DevOps capabilities at DevSquad, where I contribute to cloud migrations, improve system reliability, and boost team productivity through effective knowledge sharing.
